

LOGY Whitepaper

The Future of Gaming Utility

1. Executive Summary

LOGY is a utility gaming coin built on the BNB Chain, designed to power the next generation of blockchain-based games. With a fixed supply of 1 Billion LOGY tokens, LOGY will serve as the primary in-game currency for our gaming ecosystem, enabling transactions, rewards, and participation in our growing metaverse. The vision of LOGY is to bridge traditional gaming with blockchain technology, providing players with true ownership of assets, seamless token utility, and access to a global gaming community.

2. Vision & Mission

Vision: To create a decentralized gaming economy where players have full control, ownership, and value for their time and skills.

Mission: To develop high-quality blockchain games powered by LOGY, while building a sustainable token ecosystem that evolves into its own blockchain and metaverse.

3. Tokenomics

Total Supply: 1,000,000,000 LOGY **Blockchain:** Binance Smart Chain (BNB) – migrating to LOGY Chain in the future. **Token Utility:** - In-game currency for transactions. - Rewards for players. - Staking and governance in the ecosystem. - Marketplace trades (NFTs, skins, in-game items).

4. Roadmap

Phase 1: - Team foundation - Whitepaper development - Website launch - LOGY Token launch - Development of 2D Game

Phase 2: - Marketing campaigns - Presale - CoinMarketCap (CMC) & CoinGecko listings - Beta testing & community feedback for 2D game

Phase 3: - Full Game Launch - DEX & CEX Listings - LOGY Blockchain Development - 3D Game Development - Expansion into Gaming & Metaverse Ecosystem

5. Community & Ecosystem

LOGY is not just a token—it's a community-driven project. The gaming economy will expand to include: - Player governance via DAO (Decentralized Autonomous Organization). - Partnerships with game developers. - Integration into metaverse and cross-chain NFT marketplaces.
